OFFICE OF CLERK OF BOARD OF SCHERVISORS, No. 7 City Hall, New-York, Nov. S, 1858. Messages from the Mayer. The following was re-seived from the Mayer, vetoing the report in favor of payin the bill of H. Heren, for cleaning chamber of the Board of St

privious, viz:

Mayon's Office, New-York, Nov. 4, 1838.

To the Honerable the Common Council:
GENTLEMEN: I herewith return to your Honorable Body,
without my approval, a resolution sllowing the bill of H. Heron,
menuting to \$24, for keeping clean the chamber of the Baord
of Supervisors and Clerk's office, for August and September last,
and directing the Controller to pay the same.

I have ascertained that during the period for which your
resolution provides payment for the work in question, the party
whe performed the same was employed by the Keeper of the
City Hall at a rate of wages of \$1 per day, and which was inteeded to include all labor done by her in the City Hall, or any
of the chambers or office a thereof.

There there circumstances, I have deemed it my duty to return

Which was laid on the table, directed to be entered in the

the paper to your Honorable Body for reconsideration.

Which was laid on the table, directed to be entered in the minotes, and published in one or more of the newspapers employed by the county.

The following was received from the Mayor, viz:

MAYOR'S OFFICE, NEW YORK, Nov. 4, 1856.

To the Honorable the Hoard of Supervisors:

GENTLEMEN—I herewith return, with my objections, the resolutions adopted by your Honorable Body, directing the Committee on Civil Courts to employ counsel in the cause of The People of the State of New York, and appropriating \$2.59 therefor, also, directing the Committee on Civil Courts to employ counsel in the cause of The People of the State of New York, and appropriating \$2.50 therefor, also, directing the Committee on Annual Taxes to employ rounsel to defend the Supervisors in the cause of the Albion Life Insurance Company, and appropriating \$2.50 for the same. From the examination I have made in regard to the suit first mentioned, it appears that the State commence d, in the first instance, an action against Mr. Stont, as Chamberlain, in the month of August. 1857, which was discontinuated in January of this year—the object of such discontinuance having been, as I am informed, to get the venue of place of trial changed from New York to Albany.

By this means, at a Special Term of the Supreme Court, and in the absence of the Counsel to the Corporation from Albany, a default was taken against the city by the State Controller, the Counsel to the Corporation and myself have conferred together people the subject, and the matter is still under consideration. I sun, however, informed by Mr. Busiced that he has already taken.

But whatever may be the final result of the action, I am well satisfied that the entire defense of the asme belongs to the Counsel to the Corporation and the city, and that the Baard of Supervisors have no authority by law to give any direction in the matter. The suit, it will be seen, is not against Mr. Stout, as County Treasurer, but as Chamberlain of the city—as such

charge and preper conduct of the law business of the city as well as the county, under the direction of the Common Council or Beard of Supervisors, upon the Commel to the Corporation, the same as they do the fiscal concerns of the city and county upon the Controller, should the Counsel fail in the discharge of his proper duties, the remedy is provided by the Charter by which the office is created.

Emigration to Oceanica.—A project is on foot to establish a colony upon an island in the South Pacific Ocean; among its products are various gums, spices and deywoods; upon its coasts are found pearls tortoise-shell, and trepang; its forests abound with valuable ship-timber, and deposits of fossil coal have been discovered. The oction-plant, the sugar-cane and indigo are indigenous in this and neighboring islands, and can be entitivated to great advantage. Two copes of grain yearly are readily produced. Game, in great variety, and finits of many kinds, are no where else found in such profusion.

The climate is generally units and salobrious.

The epulation consists of a few petty tribes of an inoffensive and interesting race. A wise and patental policy being energiesd toward them by enlightened colonists must unquestionably result in a most prosperous development of this insular region.

No European Government has set up any claim to this island, it will be advantageously situated as a coaling station for lines of steambiles rounting from our Pacific coast to Australia.

The projector of this enterprise has spent some time in this region, and has carefully matured a pian of emigration and colonization, which he will direct until a settlement is effected.

A company is partly formed of respectable Agriculturists and Mechanics, with their families. The elliperasilp Shelter will sell for the island Dec. 13 next, in order to arrive in the Indian Seas at the commencement of the Southeast Munscon, the most agreeable season of the year. The great advantages presented to the Oceanic colonists are that land cost aimest noting that labor is cheap and abundant; also, that the chief of tropical products are higherous and conbex proven under more favorable circumerable return can be immediately made from the spontaneous products of the forests

SETTLEMENT OF NEW-ENGLAND.

BY JOHN GORHAM PALFREY.

In one vol., 8vo., pp. 659.

This work treats of the physical geography, the natural history and the aborizinal inhabitants of New-England; of the early explorations of that country, from the visits of the Nortamen to the voyage of Captain John Smith; of Purianism and Purian politics in England, during the reigns of Elizabeth, James the First, and Charles the First; of the unsuccessful attempts to make settlements in Massachusetts and in Maine; of the origin of the Scood Congregation, and its retinoval to Holland; of the plantation at Plymouth; of the formation of the Massachusetts Company, and the origin of his colony in Massachusetts Bay; of the early proceedings of the Massachusett Government, including those relating to Roger Williams, and to the party of Mrs. Hutchinson; of the paintations about Narragament Bay, in New-Hampshire and Maine, on Connecticut River, and at New-Haven; of the war with the Fequot Indians; of the surrender of the New-Hampshire towns to Massachusetts; of the instinution in that colony of a Legislature with two coordinate branches; and of the confederation of the Four Colonies of New-England.

The volume is linestrated with an engraved Map of New-England, and with lithographic fac similies of Smith's Map of 1614, of Wood's Map of 1623, and of Captain Undernill's representation of the Assault on the Fequot Fort.

The price of the volume, bound in cloth, will be \$2.25.
It is the author's intension to continue the narrative in two more volumes, to the time of the overtratow of the Smath dynasty, and the expublish on Governor Andros from Massachusetts in 1629. The present volume, however, covers a definite period—the period of the framing of those institutions which have educated the people of New England, and determined the course of their later harder.

"His 'Life of Frederick the Great' has long been eagerly anticipated, and now that it has been published it is selred upon with as much avidity as though it were a new novel by Bulwer of Dickens. There is no abstement of the old Carlylean strength, or humor, or quaintness, with which the reading world is already so familiar, which so many have tried in value to initiate, and which still remains unique and impossible to all but their inventor and master."

is already so familiar, which so many have tried in vata to inditate, and which still remains unique and impossible to all but their inventor and master."

From The N. Y. Evening Post, Nov. 6, 1858.

"If the two volumes which are to succeed shall equal the two which we have read, Carlyle's Life of Frederick the Great must be regarded as his greatest work. The author has explored a field which has never been intelligently and thoroughly travered by a competent historian, and the result is a historical resurrection of scenes and persons in the eighteenth century which few readers were prepared to anticipate."

"No labor can be compared to the literary toll, of which the marks are conspicuous on every page of these volumes. Such handling of antique musty documents, such thrashing of hisks for a few rains of corm, such eye-destroying, soni-depressing pertinectly of research as their composition has evidently demanded of the author, almost place the miranulous diligence of Gibbon himself at a discount. Seldom, indeed, is the inspiration of a man of gethus so happily combined with the dogged faithfulness of a drudge."

From The National Review (London), Oct., 1858.

"Of the richness of Mr. Carlyle's book in tirmiy-drawn and vivid pictures of men and things—of its fantastic humor and ruggeo, manly pathos, no idea can be gathered except from its own pages. "There is one characteristic of Mr. Carlyle's book in tirmiy-drawn and vivid pictures of men and things—of its fantastic humor and ruggeo, manly pathos, no idea can be gathered except from its own pages. "There is one characteristic of Mr. Carlyle's book in tirmiy-drawn and its less than a solemn sense of the mystery and wonder of human life and of the oniverse in which it is placed is never absent from him. This important work is the first serious attempt that has ever been made to collect together, into one volume, all the facts respecting the great about evil, Prostutution. It contains a brief annumary of all the facts and statistics given in the famous work of Parent Duchatelet, and in the more recent works by various authors on Prostitution in Eurland, Germany, &c. The subject of Prostitution in the United States is most thoroughly treated, with copious statistics from the Police records and other authentic sources of information. Dr. Sanger's official experience, and the opportunities opened to him by the Governors of the Almshorise, have undoubtedly enabled him to produce a work that will becessarily become the text-book on this painful but vitally important subject, and which, as such, most form part of the fibrary of every magistrate, physician and philanthropist, not only in this country, but throoghout the civilized world.
